ABSTRACT:

PROBLEM TO BE SOLVED: To transmit image data having the capacity larger than the allowable capacity per meter of a mail server with a simple operation.

SOLUTION: This image transmitter for transmitting image data to the

mail

server by e-mail is provided with a capacity setting part 12 for setting the

allowable capacity per meter that can be receiver by the mail server, an image

selecting part 13 for selecting an image to be transmitted by mail among a

plurality of images stored in a memory 15, an image dividing part 17 dividing a

set of selected images into a plurality of sets, a mail preparing part which

prepares a plurality of mails in each set of the divided images and also attaches the divided images to each mail and a transmitting part 18 transmitting a prepared mail to the mail server.
